Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/786,322	Applicant(s) LAFONTAINE, DANIEL M.	
	Examiner Roy D. Gibson	Art Unit 3739	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/23/2008 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 43, 44, 46 and 49 are rejected under 35 U.S.C. 102(e) as being anticipated by Hammack et al. (6,679,906). Hammack et al. disclose a device for minimally invasive medical treatment, comprising:

a tubular member having a proximal end and a distal end (Figure 1, # 10); a cryo therapy apparatus (16) connected to the distal end of the tubular member; and an optical sensor (Figure 3B, # 21, infrared sensor, see col. 10 lines 34-40) to monitor temperatures created by use of the cryo therapy apparatus, the optical sensor coupled

to a retractable member (Figure 3B, temperature probe) capable of moving independently of the cryo therapy apparatus; wherein the cryo therapy apparatus is sized and arranged for vascular introduction;

further comprising a temperature quantification device (controller) in communication with the optical sensor; and wherein the optical sensor is positioned to be capable of observing ice or ice ball formations created by the cryo therapy apparatus; and

wherein the optical sensor is disposed at least partially within a lumen (15) defined in the tubular member (col. 3, lines 4-27, col. 6, line 10-col. 7, line 6, col. 8, line 55-col. 9, line 42 and col. 10, lines 10-51).

Allowable Subject Matter

Claim 52 is allowed.

Claim 50 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Muni (5,853,408) discloses the equivalence of a thermocouple and an optical sensor (col. 3, lines 41-50).
